

Prinsen Berning amongst the world's top 35% EcoVadis Sustainability Rating

At Prinsen Berning, we remain committed to conducting our business with integrity, responsibility, and a long-term view toward sustainable growth. In line with this commitment, we are pleased to inform you that **Prinsen Berning has been awarded the EcoVadis Bronze Medal**, placing our organization within the **top 35% of all companies evaluated globally** through the EcoVadis sustainability assessment. This recognition reflects an independently verified confirmation of our sustainability progress.

EcoVadis is one of the world's most trusted providers of business sustainability ratings, evaluating companies across four key themes: **Environment, Labor & Human Rights, Ethics, and Sustainable Procurement**. Achieving the Bronze Medal demonstrates that Prinsen Berning has established a strong foundation across these domains and has aligned its processes with internationally recognized standards for corporate responsibility. While the medal acknowledges our current performance, it also highlights our commitment to continuous improvement and our ambition to further strengthen our sustainability roadmap.

As a leading manufacturer of performance nutrition products, we understand that sustainable operations are not only essential for long-term business performance but also integral to the trust you place in us as your supplier. We continue to invest in the development of our sustainability strategy, enhance our environmental reporting processes, optimise waste and energy management, and deepen our engagement with responsible procurement practices.

Should you require any additional information regarding our EcoVadis results or our broader sustainability initiatives, our team is available to support you. We value the trust you place in Prinsen Berning and look forward to strengthening our partnership through responsible, future-oriented business practices.
